## Professional Experience

### React & Angular Front-End & UI Developer

May 2022 – Oct 2024

**Tata Consultancy Services** (IT services, consulting, and business solutions) (Uruguay)

- Developed and maintained complex web applications using React.js and Angular v15, improving performance and user experience for large-scale clients.
- Built modular, reusable UI components with React and styled-components, increasing development efficiency and design consistency.
- Created responsive user interfaces with HTML, CSS, and TypeScript, ensuring compatibility across mobile, tablet and desktop devices.
- Integrated front-end components with RESTful APIs and server-side technologies (Node.js/Express), enabling seamless data flow.
- Conducted accessibility audits and implemented WCAG-compliant fixes for a PwC project, enhancing inclusivity and compliance.
- Produced detailed technical documentation of application changes, earning recognition from project leadership for clarity and thoroughness.

### JavaScript & React Web Development Teaching Assistant

Feb 2022 – Apr 2022

**Bootcamp Henry**

- Guided students through JavaScript fundamentals, React hooks, state management, and core front-end concepts.
- Led hands-on coding sessions using Git and GitHub, teaching version control best practices and agile methodologies.
- Coached students in building single-page applications using React and Node.js, emphasizing responsive design and API integration.

## Pet Projects

### Full Stack Developer (Mar 2022 – Apr 2022)

- **E-Commerce Platform:** Built a full-stack, responsive e-commerce site in a team of eight using React, Redux, Node/Express and PostgreSQL. Developed admin CRUD features, user account management and secure checkout with real-time inventory updates.
- **Videogames Cave** (Feb 2022)  
Designed and coded a SPA leveraging RAWG.io API to search, filter and create videogames. Implemented game creation with form validation and persisted data with PostgreSQL/Sequelize.

### Front-End Developer

#### - Movie Finder App — (Jan 2022)

Created a movie search app with React, Redux and Bootstrap. Implemented detailed movie views and a favourites list with add/remove functionality.

#### - Weather App (Dec 2021)

Developed a multi-location weather tracker using React. Added features for humidity, temperature and hourly forecasts with responsive design.

#### - Time Tracker App (Jan 2022)

Built a responsive React/Bootstrap app with real-time timers and countdowns; used hooks for state management and designed a clean interface.

## Skills

**Programming Languages:** JavaScript, TypeScript

**Front-End:** HTML5, CSS3, React, Angular, Redux, Redux Toolkit, NextJS, React Native, Tailwind, Expo, Bootstrap

**Back-End:** Node.js, Express.js, Sequelize, Prisma, Drizzle, Mongoose

**Database and Version Control:** PostgreSQL, MongoDB, Git/Github
